

May 28, 2013

Dear Gov. Snyder,

I am writing to ask your help in a very important matter to our family and to thousands of families in Michigan. You are my elected governor and I have never personally asked for anything in my life. But I am asking for your help now. My nephew, Shawn received a traumatic head injury in a car accident in '97. My sister in law's, brother was involved in a car accident in 2005, he died after six weeks. Please be aware, Mr. Snyder that the drivers of our families were not at fault, Black ice and a drunk driver placed our loved ones in this position. My point being, all were insured with No fault and at least the medical bills of over a million dollars were taken care of by their No Fault insurance. You seem like an active, aggressive Legislator and we certainly need someone in Lansing who is enthusiastically committed to their job. So as my elected legislator, I am asking you to vote NO on HB4612. I am asking for your help to stop this horrible bill from going any further. Please let me know your ideas on this. I would be glad to discuss alternative medical cost saving ideas with you and explain the horrible impact of catastrophic accidents on our families. It would be a pleasure to meet with you ! You can understand that we only want to take care of our families and the loved ones of Michigan drivers/voters. Thank you for your consideration in this matter.

Sincerely yours,,

Penelope DeShaw

Life long resident and voter of West Michigan !

Please Remember
Shawn !
