

# Swallowing and Speech Therapy

Ms. Lea, helping Shawn's Bark as well as Bite !

From their first meeting, Lea had Shawn, literally eating out of her hands ! Shawn has some serious swallowing & speech issues, which we believe can be improved by working w/ Lea. Definitely, a great duo !

The less choking and coughing, the better !

Here is an update on Shawn's progress so far !

- Taking any pills with applesauce, 90% non choking improvement !
- Use of weights on his arms for exercise but mainly to serve as a cue to slow the eating and swallowing process w/o parental intervention. Great !
- Sticking out the tongue and holding it with the teeth. A tough one for Shawn but it will give him more control of eating and therefore swallowing.
- Adjusting TV height can help stop choking. Hey, trust us on this one ! :-)

Lea Norbotton, another fine, hardworking, dedicated Spectrum therapist, with one ultimate goal, helping the patient, "Be all that they can Be !"

Bless her !  
The Wielands
